To: Thomas McGinty <topcatmcg@gmail.com>, Jim Horan <HoranJ@spprep.org>

Tom and Jim,

Attached are plans of the north and south façade elevations of the St. Peter's Grammar School showing the elevations and alignment out of vertical of the older building on the western (Van Vorst) side. As you can see, at the top of the building the façade is about 6 inches out of vertical alignment outward to the street. My apologies for the delay as they had to go back out to confirm some items. Hopefully this provides all the information that you will need. Let me know if you need anything further.

Thanks,

Liam
